- AI-Assisted Development Workflows
- Website Maintenance, Debugging, and Optimization
- Performance Optimization and Core Web Vitals
- Technical SEO Implementation
- Responsive UI and Mobile-First Development
- Client Communication and Remote Collaboration
- Gutenberg and Custom Block Development

PROFESSIONAL EXPERIENCE

Founder and WordPress Developer

Feb 2026 - Present

Vicunav — Remote — vicunav.com

- Founded Vicunav, a WordPress web studio delivering professional websites for service-based businesses, wellness brands, therapists, and local companies.
- Developed WordPress websites using Elementor, Elementor Pro, custom CSS, responsive layouts, contact forms, booking flows, optimized content structures, and performance best practices.

- Built and implemented an AI-assisted development workflow using ChatGPT, Codex, and Claude for content planning, UX structure, code generation, QA, and delivery optimization, reducing production time per project.
- Applied technical SEO foundations with Rank Math, Google Site Kit, schema markup, structured headings, optimized metadata, internal linking, and local business positioning.
- Managed hosting environments, security configurations, backups, plugin updates, and ongoing website maintenance for client projects on SiteGround.
- Led projects from discovery to post-launch support, covering content strategy, design direction, build execution, revisions, and client handoff.
- Used Figma, WordPress, Elementor, SiteGround, SG Optimizer, custom CSS, and JavaScript to streamline design-to-development handoff and improve project delivery.

Career Break: Family Caregiving and Technical Development

Jun 2025 - Jan 2026

Remote

- Took a planned career break for family caregiving while continuing structured professional development in WordPress, AI-assisted development, and modern site delivery workflows.
- Practiced with ChatGPT, Codex, and Claude to develop faster workflows for WordPress development, debugging, UI refinement, content structuring, and client delivery.
- Deepened hands-on experience in Elementor, WordPress performance, technical SEO, site architecture, and service-business website strategy.

Web Developer

Sep 2019 - May 2025

Van Lance Media Group — Remote

- Developed and maintained high-performance websites for international clients, delivering across frontend implementation, CMS customization, performance optimization, and remote team collaboration.
- Built responsive website interfaces using HTML, CSS, JavaScript, CMS templates, and reusable components with mobile-first development practices.
- Worked on WordPress and CMS-based projects including theme customization, content updates, landing pages, technical fixes, plugin configuration, and client improvements.
- Improved site speed and UX by applying Core Web Vitals optimization, lazy loading, image compression, asset optimization, and Lighthouse performance auditing.
- Integrated APIs and third-party tools for marketing automation, analytics, forms, and business operations.
- Collaborated with remote teams across design, marketing, development, and client services to deliver production-ready websites on business deadlines.

WordPress Developer

Aug 2018 - Aug 2019

Redstage — Buenos Aires, Argentina, Remote

- Developed WordPress-based internal tools and website functionality, including a custom internal CRM built for the CTO using WordPress custom post types and fields.
- Worked across frontend development, CMS architecture, custom content structures, and deployment coordination.
- Collaborated with product and marketing teams to support technical delivery, improve website workflows, and maintain smooth production releases.
- Built scalable templates, improved site architecture, and supported high-traffic projects in a remote development environment.

Web Developer

Dec 2016 - Aug 2018

Trafalea Group — Buenos Aires, Argentina, Remote

- Developed responsive web interfaces for international digital brands, focusing on conversion-focused layouts, mobile-first design, performance, and fast production workflows.
- Worked with HTML, CSS, JavaScript, Git, CMS templates, and reusable UI components across high-velocity launch cycles.
- Improved page speed, UX consistency, and frontend quality for marketing campaigns and business-critical website updates.
- Collaborated with design, marketing, and development teams across remote production environments.

WordPress Web Developer

Apr 2014 - Dec 2016

Upwork — Merida, Venezuela, Remote

- Built WordPress websites for international clients, progressing from CSS fixes to full website development, theme customization, and responsive frontend implementation.
- Customized WordPress themes, edited templates, improved mobile layouts, configured plugins, and delivered client-requested website improvements.
- Built a strong foundation in client communication, scope management, responsive design, WordPress customization, and deadline-driven remote delivery.
